DISCHARGE SUMMARY

Patient Name:	John Smith	Discharge ID:	DS-2024-1210
Age:	45 years	Admission Date:	December 5, 2024
Gender:	Male	Discharge Date:	December 10, 2024
Patient ID:	patient_1	Ward:	General Medicine - Ward 3
Attending Doctor:	Dr. Sarah Johnson	Total Stay:	5 Days

1. Primary Diagnosis

Hypertension Stage 1 with Hyperlipidemia

Secondary Diagnosis: Mild anxiety disorder

2. Reason for Admission

Patient presented with persistent headaches, dizziness, and elevated blood pressure readings (160/100 mmHg) for 3 consecutive days. Patient also reported chest tightness and mild shortness of breath on exertion.

3. Treatment During Hospital Stay

- Day 1-2: IV fluids, continuous BP monitoring, ECG performed
- Day 2: Started on oral antihypertensive medication (Lisinopril 10mg)
- Day 3: BP stabilized at 130/85 mmHg. Blood work completed.
- Day 4: Cardiology consultation done. Echo-cardiogram performed — normal.
- Day 5: BP stable at 125/82 mmHg. Patient ambulatory. Cleared for discharge.

4. Medications on Discharge

Medication	Dosage	Frequency	Duration
Lisinopril	10mg	Once daily (morning)	90 days
Aspirin	81mg	Once daily (with food)	90 days
Atorvastatin	20mg	Once daily (night)	90 days
Vitamin D3	2000 IU	Once daily	90 days

5. Doctor's Instructions

- Monitor blood pressure daily at home. Target BP: below 130/80 mmHg.
- Follow a low-sodium diet. Limit salt intake to less than 2g per day.
- Avoid alcohol and smoking completely.
- Light exercise recommended: 30 minutes walking daily.
- Avoid stressful situations. Practice deep breathing or meditation.
- Return to ER immediately if BP exceeds 160/100 mmHg or chest pain occurs.

6. Follow-Up Appointment

Doctor	Specialty	Date	Time
Dr. Sarah Johnson	General Medicine	December 24, 2024	10:00 AM
Dr. Mark Wilson	Cardiology	January 5, 2025	2:00 PM
